

Open World Module for application hosting

KEY CHARACTERISTICS

Multi-purpose, Powerful, Reliable, Secured
Compact and LRU saving platform

TECHNOLOGIES

- Multicore for enhanced computing capacities
- SysGo PikeOS Hypervisor for safety of multi application and security segregation
- Multi OS support: Linux, Posix, A653
- Integration of open sources technologies for cost reduction and reduced time to market

OPERATIONAL SCENARIO

- Remote and secured access to maintenance aircraft with mobile device (Worldwide or local)
- Secure A615-A Load Import from the cloud server to the Aircraft
- Remote Dataloading of an Avionic Target
